In a mixing glass, combine ¼ tsp orange bitters, 1½ oz dry vermouth, and 1½ oz dry gin. Stir with ice until the dilution has brought the total volume to 4<sup>19</sup>/<sub>42</sub> oz. Note that  $-6 \times -7 = 40 + 2 = 42 \div 1$ , and  $f(x) = vg \cdot ag$

**misc.**    \*†\$¥[????]    \*†\$¥[????]    \*†\$¥[????]    \*†\$¥[????]    \*†\$¥[????]    \*†\$¥[????]

<sup>1</sup> Footnote text ain’t gotta be nuttin’ special. Some formats are snazzier than others, but usually the onus is on the page designer, not the type designer.  
<sup>2</sup> It’s preferable for the currency symbol to match the height of the figures.
